M_o_R® Practitioner Classroom

The **M_o_R Practitioner course has been designed to provide delegates with the opportunity to practice the practical application of the M_o_R method and covers the twelve M_o_R principles; Approach, Process and the basic techniques essential to managing risks using the M_o_R guidance. It will allow delegates to attempt a number of OTE style questions both in groups and individually.**

Adopting the M_o_R approach will enable organisations to meet the risk elements of the UK Financial Reporting Council's Combined Code on Corporate Governance, as it defines the essential building blocks to establish, develop and embed risk management as a corporate process. M_o_R covers a wide range of topics, including business continuity management, security, project / programme risk management and operational service management.

These topics need to be placed into the context of an organisation framework for the **Management of Risk**. Some related topics such as security are highly specialised and the M_o_R guidance provides only an overview of such aspects. The successful completion of the Practitioner Examination will give the delegates a recognised accreditation.

COURSE CONTENT

This course follows the Practitioner syllabus and focuses on the application of all the areas covered in the M_o_R Foundation Course.The course gives the delegates an opportunity to practice Practitioner style questions in preparation for the Practitioner paper by integrating the following:
